## **SPRINT 1**

Date	10 November 2022
Project Title	personal Assistance for seniors who are
	self-reliant
Team id	PNT2022TMID01703
Title	SPRINT 1

## Urls.py:

```
urlpatterns = [
  path("", views.college, name="college"),
  path("notice/<int:myid>/", views.notice, name="notice"),
  path("application_form/", views.application_form, name="application_form"),
  path("edit_application/", views.edit_application, name="edit_application"),
  path("status/", views.status, name="status"),
# Authentication
  path("register/", views.register, name="register"),
  path("login/", views.loggedin, name="login"),
  path("logout/", views.loggedout, name="logout"),
# Admin
  path("handle_admin/", views.handle_admin, name="handle_admin"),
  path("users/", views.users, name="users"),
  path("student_application/<int:myid>/", views.student_application, name="student_application"),
  path("application_status/<int:pk>/", UpdatePostView.as_view(), name="application_status"),
  path("approved_applications/", views.approved_applications, name="approved_applications"),
  path("pending_applications/", views.pending_applications, name="pending_applications"),
  path("rejected_applications/", views.rejected_applications, name="rejected_applications"),
]
```

## **Code Explanation:**

It is considered to be a good practice to create a separate urls file for each app. The urls are into three

```
parts 1) For users 2) User Authentication 3) For admin
```

## Models.py

```
from django.db import models
from django.contrib.auth.models import User
from django.utils.timezone import now
from django.urls import reverse
class Application(models.Model):
  COURSES = (
  ('Computer Science Engineering', 'Computer Science Engineering'),
  ('Information Technology Engineering', 'Information Technology Engineering'),
  ('Electronics and Telecommunication Engineering', 'Electronics and Telecommunication Engineering'),
  ('Electronics Engineering', 'Electronics Engineering'),
  )
  STATUS = (
    ('Approved', 'Approved'),
    ('Pending', 'Pending'),
    ('Rejected', 'Rejected'),
  )
  user = models. One To One Field (User, on\_delete = models. CASCADE, blank = True, null = True) \\
  course = models.CharField(max_length=100, choices= COURSES)
  name = models.CharField(max_length=200)
  email = models.CharField(max_length=200)
  phone no = models.CharField(max length=200)
```

```
address = models.TextField(max_length=200)
  student profile = models.ImageField(upload to="images")
  ssc percentage = models.DecimalField(max digits=4, decimal places=2, null=True)
  ssc marksheet = models.ImageField(upload to="images", null=True)
  ssc passing certificate = models.ImageField(upload to="images", null=True)
  ssc_leaving_certificate = models.ImageField(upload_to="images", null=True)
  hsc percentage = models.DecimalField(max digits=4, decimal places=2, null=True)
  hsc_marksheet = models.ImageField(upload_to="images", null=True)
  hsc_passing_certificate = models.ImageField(upload_to="images", null=True)
  hsc_leaving_certificate = models.ImageField(upload_to="images", null=True)
  cet_percentile = models.DecimalField(max_digits=5, decimal_places=3, null=True)
  cet_scorecard = models.ImageField(upload_to="images", null=True)
  jee percentile = models.DecimalField(max digits=5, decimal places=3, null=True)
  jee_scorecard = models.ImageField(upload_to="images", null=True)
  Application Status = models.TextField(max length=100, choices=STATUS, default="Pending")
  message = models.TextField(max_length=100, default="")
  def str(self): return self.name
  def get_absolute_url(self):
    return reverse('users')
class Notice(models.Model):
  title = models.CharField(max length=200)
  def str(self):
    return self.title
class Detail(models.Model):
  title = models.ForeignKey(Notice, on_delete=models.CASCADE)
  notice = models.CharField(max length=200)
```

```
def str(self):
return self.notice
Code Explanation:
```

Code Explanation:

The most important model of python college admission system is the Application model. It stores all the details of the students personal and educational details. The student while filling the application form gives all these details. The status and message are edited by the admin. Notice and Detail model stores the notice for first, second, third, and fourth year students. It is possible to add any notice for any category of students.

1. For the home page, all the notice for different year students will be shown (college.html): <div class="container mt-4"> <h1>Important Notice</h1> <div class="row mt-4"> {% for i in notice %} <div class="col-sm-6"> <div class="card"> <div class="card-body"> <h5 class="card-title">{{i.title}}</h5> <a href="/notice/{{i.id}}/">View all recent updates.</a> </div> </div> </div> {% endfor %} </div> </div> Views.py: def college(request): notice = Notice.objects.all() return render(request, "college.html", {'notice':notice})

On the first page of the project all the notices will be displayed by using the for loop from the N model. Students can see the notice by clicking on the title regarding their year or branch.
